KLCC Property Holdings Berhad
Net Zero Carbon Emissions by 2050

KLCC Property Holdings Berhad commitment is to achieve net zero carbon emissions by 2050 that is in line with PETRONAS Statement of Purpose.

The Commitment is informed by:

i. PETRONAS' business context
ii. Relevant national policies
iii. Applicable international frameworks
iv. Climate science

In line with the above, we will continue to explore business growth opportunities in the low carbon economy and we will take actions to reduce our operational greenhouse gas emissions, through decarbonisation levers, such as:

i. Energy efficiency
ii. Carbon capture and storage
iii. Electrification

Carbon offset will only be used for the remaining hard-to-abate emissions as recognised and allowed for by relevant international standards.

All employees are required to align all business activities with the approach and targets set by PETRONAS Group to achieve net zero carbon emissions by 2050.
